Shiplap Timbers

total timber solutions - www.svw2000.co.uk

Our Shiplap Timbers are available in a choice of either tongue and grooved or rebated designs.

Both choices are milled by ourselves from quality kiln dried redwood timbers and pressure pre-treated to ensure long term protection against wood decay and insect attack.

Our shiplap designs provide a cost effective yet high performance material for a wide range of garden buildings and sheds, as well as general cladding applications.

Specific shiplap designs not included in our general range shown in the following pages can also be supplied on request.

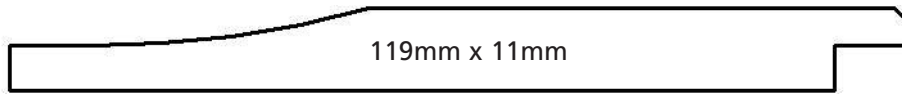

PRESSURE TREATED TIMBER

SHIPLAP TIMBERS - REBATED
